

INSTALLING COMPNET On Windows XP (this is the information you will need to access)

1. From the Start Menu, go to the Control Panel and Double Click On the Internet Options icon.
2. Select the Connections tab at the top of the Internet Properties Screen.
3. Select the setup button.
4. Select the next button on the first screen of the Connection wizard.
5. Select the Connect to the Internet Option on the next screen and then the next button.
6. Select the Set up my connection manually option on the next screen and select the next button at the bottom.
7. Select the Connect using a dial-up modem option on the next screen and then the next button at the bottom.
8. Type Compnet in the ISP Name field on the screen and then the next button at the bottom.
9. Type the dial-in number given to you at time of sign-up. If you do not have this information they are listed at the bottom of this page.
10. Enter your user name and password on the next screen making sure that they are both in all lower case letters. Also make sure all three check boxes are checked at the bottom and then select next at the bottom.
11. On the last screen place a check mark in the box that says add a shortcut to this connection to my desktop and then select finish.

Dial-in numbers

Madisonville – 4422199

Athens – 7452773

Knoxville – 5225353
